

UMANI

UMA + ANI

Rebranding & Product Direction

From a farm-stay concept to a farmer-centered agritourism ecosystem.

CORE IDEA

UMANI brings the whole farm online.

1. Why We Are Rebranding

The previous identity, AgriBnV, was built around the idea of agriculture, bed, and venture. As the product evolved, that identity became too narrow and no longer represented what we are building.

UMANI reflects our new direction: a farmer-centered digital platform where a farm can showcase its full identity, offerings, stories, activities, and products—not only its accommodation.

The strategic shift

Agribnv Direction	UMANI Direction
Farm-stay / booking focused	Whole-farm digital presence
Tourist searches for accommodation	People discover farmers and farms
Transaction-centered	Discovery + engagement + transactions
Accommodation as the main offering	Stay + experiences + events + products + kitchen + content
Farm as a destination	Farm as a living story and ecosystem

2. What UMANI Means

UMANI is inspired by the combination of UMA and ANI.

UMA	ANI
Farm / farmland / agricultural space	Harvest / what the farm produces

Together, the name supports the idea of the farm and everything that comes from it: its produce, experiences, stories, people, and opportunities.

3. The UMANI Vision

UMANI is a digital platform where farmers can bring their entire farm online—from farm stays and experiences to events, products, farm kitchens, and short-form content.

The platform is designed to help farmers earn from more than harvest by making their farm discoverable, engaging, and accessible to visitors and customers.

Positioning

A farmer-centered agritourism platform that connects people to farms through discovery, experiences, content, and commerce.

4. The UMANI Farm Ecosystem

FARM PROFILE

The farmer's digital home: farm story, location, crops/livestock, facilities, photos, and information.

FARM STAY

Rooms, cottages, rates, availability, and accommodation details.

FARM EXPERIENCES

Hands-on agricultural activities, guided tours, educational activities, and other farm experiences.

EVENTS & SCHEDULE

Upcoming farm events, seasonal activities, workshops, harvest periods, and scheduled experiences.

FARM PRODUCTS

Produce and processed products that visitors or customers can discover and purchase.

FARM KITCHEN

Farm-to-table meals, menus, local specialties, and advance food orders.

FARM FEED

Short-form farmer-created videos and posts showing real farm life, harvests, activities, products, and stories.

5. The Farm Feed: Discovery Through Content

UMANI will include a short-form content experience inspired by modern social media platforms. Farmers can create videos and posts directly within the platform.

- Harvest and planting updates
- Day-to-day farm life
- Animals and crops
- Behind-the-scenes farm work
- Farm products and food
- Upcoming events
- Farm experiences
- Farmer stories and educational content

We can't all tell their story, so we made a way for them to tell their own story.

Important product principle: The Farm Feed is not social media for its own sake. It is the discovery engine that can lead people from content → farmer → farm → experience/product/stay.

6. The New User Journey

DISCOVER → EXPLORE → ENGAGE → EXPERIENCE → SUPPORT

1. DISCOVER — A person sees a farmer's video, post, product, event, or farm.

2. EXPLORE — They visit the farmer's UMANI profile and see the whole farm.

3. ENGAGE — They follow, interact, save, inquire, or share content.

4. EXPERIENCE — They can visit, stay, join an activity/event, eat at the farm kitchen, or buy products.

5. SUPPORT — The farmer gains multiple potential income channels and a direct digital presence.

7. Value to Farmers

- One digital home for the entire farm
- More ways to generate income beyond selling raw harvest
- Direct visibility to tourists, customers, and agriculture enthusiasts
- Ability to promote stays, experiences, events, products, and food
- A content channel to tell the farm's story
- A more organized way to manage and present farm offerings
- Greater opportunity to build a long-term audience around the farm

8. What UMANI Is Becoming

UMANI should be understood as a combination of several platform functions, unified around the farmer:

Function	What it does	Why it matters
Agritourism marketplace	Connects people with farm stays, experiences, events, and offerings.	Creates opportunities for farm-based tourism income.
Farmer directory / profiles	Gives every farm a structured digital presence.	Makes the whole farm discoverable.
Social/content feed	Lets farmers publish short-form content.	Creates discovery and audience-building.
Product discovery	Showcases farm products and food.	Extends farm income beyond tourism and expands their market.
Farm information hub	Centralizes schedules, offerings, menus, and stories.	Makes the farm easier to understand and visit.

9. Developer Direction

The rebrand is not only a visual change. It changes the product architecture and the way features should connect.

Core objects to think about

- Farmer / Host
- Farm
- Farm Profile

- Farm Stay / Accommodation
- Experience
- Event / Schedule
- Product
- Farm Kitchen / Menu Item
- Post / Video
- Follower / User
- Inquiry / Order / Reservation

Key product principle

All offerings should connect back to one Farm Profile. A user should not feel like they are moving between separate products; they should feel that they are exploring one complete farm ecosystem.

10. Suggested Product Priorities

Priority	Feature	Purpose
1	Farm Profile	Foundation of every farmer's digital presence.
2	Farm Stay / Experience	Core agritourism transactions.
3	Events & Schedule	Makes farm activities discoverable and organized.
4	Products & Farm Kitchen	Expands farm monetization.
5	Farm Feed	Drives discovery and engagement.
6	Follow / Save / Share	Builds an audience around farmers.

11. Brand Direction

UMANI
Bring the whole farm online.

Supporting message: **Discover the farm. Follow the story. Experience more.**

The brand should feel agricultural, human, local, modern, and community-centered, not like a generic booking app and not like a generic social network.

12. What Success Looks Like

A successful UMANI farm profile should answer one simple question:

“What can I discover, experience, and support in this farm?”

UMANI

The farm is more than a destination.
It is a story, a livelihood, a community, and a source of possibilities.
